

Sectional view of the anomalous graphite bands of greater than 2% FC

LEGENDS

- | | | | |
|------------------|---|---|-------------------------|
| Top soil | Quartzite | Fault breccia | Termination of borehole |
| Weathered mantle | Graphite band having greater than 2% FC | Borehole point | SP anomaly |
| Khondalite | Graphite band having less than 2% FC | Borehole axis | Termination of borehole |
| Granite gneiss | Leptynite | Average true thickness × Average weighted FC% | |
